The Stoneybrook Steeplechase course was inspected on March 28, 2011 by R. Barry Watson and Marshall Glass.

Turf: The turf on this course consists of a mixture of dormant Bermuda and drill seeded rye grass that averaged four inches in height at the time of inspection. A sweltering summer has left this course considerably thinner than the past few years, particularly entering the clubhouse turn and continuing around to the backstretch. To a lesser degree these same conditions can also be found on the far turn. Stoneybrook has been fertilized and over seeded a number of times since last year. However, unseasonably cool spring temperatures have temporarily retarded germination, but a promising forecast could improve conditions for race day.

Smoothness: This course has been aerated and chain harrowed. The ground is relatively smooth throughout.

Compaction: 80 (Good). The course had a good feel under foot at the time of inspection.

Moisture: 4 (Average)

Course Update: Grass remains in good condition. Moisture 6 (Average). Chance of rain Tuesday, April 5 is 100%; weather forecast for Saturday is 86 deg. with 20% chance of rain.
