The Carolina Cup race course was inspected on March 18, 2019 by Jeff Teter.

Turf: The course is a Bermuda grass turf, which is dormant now. The course was over seeded with winter rye grass in late October. We had a very good germination and one of the best stands of rye we have ever had. The course was mowed once at 4 inches and will most likely not be mowed again. We are looking for 6 to 8-inch stand of turf.

Smoothness: The course is smooth throughout. The course was chain harrowed and aerated twice since the last race meet.

Compaction: The compaction range was from 8 to 13 (yielding to good) and averaged 9 to 11 (good) on the meter.

Moisture: Range was 2-8 (dry to average wet), average reading 4-6 (average dry to average) on the meter.

Notes: We have had 3.4 inches of rain to date in March. The course was broadcast and sprayed for weed control on February 15. The course was fertilized on February 25th.
